PROFESSIONAL SUMMARY

Backend Engineer and System Architect with 3+ years of experience designing high-throughput SaaS platforms, e-commerce ecosystems, and AI-integrated applications. Proven track record leading technical teams, architecting scalable relational and NoSQL databases, and managing end-to-end deployments for enterprise brands. Specializes in Node.js ecosystems (NestJS, Express), multi-platform API integrations, and applying machine learning workflows to enhance product capabilities.

TECHNICAL SKILLS

Languages & Frameworks: Node.js, NestJS, Express.js, JavaScript, Python

Databases & ORMs: PostgreSQL, MongoDB, TypeORM, Redis

Architecture & APIs: RESTful APIs, Webhooks, Socket.io, Omnichannel Integrations (WhatsApp Cloud API)

AI & Machine Learning: RAG Systems, Computer Vision (OCR), NLP, Deep Learning, Agentic Workflows (Claude Code, Copilot)

Tools & Infrastructure: Git, Ubuntu Linux, DigitalOcean VPS, Nginx, PM2, Firebase, Hetzner, Hostinger, Cloudflare

Payments & Delivery Integrations: Stripe, SSLCommerz, bKash, AlinmaPay, Pathao, Steadfast

EXPERIENCE

ZAAG SYSTEMS

Dhaka, Bangladesh

Software Engineer

Sep 2025 – Present

- Spearheaded backend architecture across multiple production applications using NestJS, Express, PostgreSQL, and MongoDB, taking full ownership of API design, database schemas, and external integrations.
- Re-engineered a POS payments backend to ensure graceful degradation during cache outages, improving failure response times from 12.3s to a 56ms fallback.
- Verified system readiness at 40x projected peak load with zero ledger drift during extensive load testing.
- Architected and deployed a highly scalable bulk email delivery system leveraging Redis-backed queues to process and deliver large volumes of daily emails.
- Developed a custom-domain provisioning feature for a multi-tenant SaaS platform integrating Cloudflare and Namecheap APIs, partial-payment gateways, and per-store analytics.
- Led backend engineering for Apex Footwear, delivering a secure role-based admin portal and optimizing a complex image and video processing pipeline for native iOS playback.

Jr. Backend Developer

Apr 2024 – Aug 2025

- Developed scalable e-commerce backend solutions for clients like Mumuso Bangladesh, integrating local and global services including SSLCommerz, Stripe, Pathao dispatch, and Firebase push notifications.
- Optimized a legacy PDF generation pipeline by overhauling the core processing logic, reducing generation time by 60% and improving overall system performance.
- Modernized deployment workflows by replacing manual release processes with automated CI/CD pipelines.
- Managed and monitored production infrastructure across DigitalOcean, Hetzner, and Hostinger to ensure high availability.

Orbit Digital Solutions Ltd.

Dhaka, Bangladesh

Software Engineer

Oct 2022 – Mar 2024

- Developed a computer-vision OCR pipeline to extract passport details from photographs, automating identity verification and eliminating manual data entry bottlenecks for clients.
- Architected and indexed MongoDB schemas for high-volume collections containing 50,000+ records, slashing heavy query response times by 90% (from 2 seconds to 200 ms).
- Engineered a robust scheduling API for appointment booking, streamlining operations and reducing manual scheduling efforts by 40%.
- Integrated third-party payment gateways and real-time notification services, creating resilient systems for transaction callbacks and delivery status updates.

Software Engineer Intern

Jun 2022 – Sep 2022

- Built robust REST APIs in Node.js and Express for client-facing applications, collaborating directly with frontend teams to deliver end-to-end features.
- Demonstrated rapid technical growth and reliability, resulting in a fast-tracked promotion to a full-time Software Engineer role at the close of the internship.

EDUCATION

American International University-Bangladesh <i>Master of Science (MS), Computer Science GPA: 3.75</i>	Dhaka, Bangladesh <i>Graduated: Oct 2025</i>
American International University-Bangladesh <i>Bachelor of Science (BSc), Computer Science and Engineering GPA: 3.71</i>	Dhaka, Bangladesh <i>Graduated: Sep 2022</i>
